(54) PRINTING CONTROLLER, PRINTING CONTROL METHOD AND STORAGE MEDIUM STORING PROGRAM WHICH COMPUTER CAN READ

(57) Abstract:

PROBLEM TO BE SOLVED: To provide a printing processing environment effective for a regular user who can always execute a printing information processing based on the latest printing control program.

SOLUTION: Verification information stored in an NVRAM area secured in a part of RAM 7 in accordance with a request from a computer 1 is informed to the computer 1. The printing control program transferred from the computer 1 is stored in RAM 7 and printing data transferred from the computer 1 based on the stored printing control program is transferred to a printing data recording part 3.

LEGAL STATUS

- [Date of request for examination]
- [Date of sending the examiner's decision of rejection]
- [Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]
- [Date of final disposal for application]
- [Patent number]
- [Date of registration]
- [Number of appeal against examiner's decision of rejection]
- [Date of requesting appeal against examiner's decision of rejection]
- [Date of extinction of right]

Print controller for printers - stores authentication information in memory unit which is transmitted to computer on demand, and prints data transmitted by computer based on control program transmitted by it

CANON KK 97.07.30 97JP-204283

T01 T04 (99.02.26) G06F 3/12, B41J 5/30

NOVELTY - The authentication information is stored in the RAM (7) and is transmitted to the computer on demand. The print control program transmitted by the computer is stored in RAM, based on which the data transmitted by the computer is printed.

DETAILED DESCRIPTION - The print controller (4) equipped in printer (2) communicates with computer (1) and controls the printing process. INDEPENDENT CLAIMS are included for the following: printing control procedure; memory for storing printing control program

USE - For printers.

ADVANTAGE - Offers free printing environment with minimum memory resources and with low cost devices. Prevents unauthenticated printing process. DESCRIPTION OF DRAWING(S) - The figure shows the block diagram of printer equipped with print control system. (1) Computer; (2) Printer; (4) Print controller; (7) RAM. (11pp Dwg.No.1/6)
